

A comprehensive memory clinic and specialist care solution for patients with dementia and other cognitive conditions

## Services

Specialist assessment for dementia or other cognitive concerns

Medical and behavioral management, incl. cognitive rehab therapy

Caregiver support, incl. regular counseling and access to support hotline

Psychosocial support, incl. social engagement and advanced care planning

## Benefits

**Short waiting times:** Unlike most memory clinics, we are able to assess patients within days — not months

**Deep expertise:** Specialist physicians under clinical leadership of behavioral neurologist and Chief Medical Officer Dr. Joel Salinas

**Convenient:** All services provided in-home through telehealth facilitated by in-person telehealth assistants

**Integrated:** Full communication with PCP at each step of the journey

## Outcomes

Clinically effective.

# 3 years

improvement or stability of neurocognitive function

Immediate impact.

# 92%

of patients in cognitive rehab therapy report improvement against their cognitive goals in only 3 weeks

High value.

# 30%

reduction in ED visits and hospital days for patients with dementia

Sustained engagement.

# 70%

of patients are still engaged after 6 months

Currently available across all of **New York, North Carolina, Florida, Georgia, Colorado.**
