

What is the GUIDE Model?

The GUIDE (Guiding an Improved Dementia Experience) Model is a new program from Medicare. Isaac Health is taking part in this program to help you and your caregiver access more support and resources. If you are eligible, **Medicare covers the cost of all services** that will be made available through the GUIDE program with Isaac:

Around-the-clock support

We're always there for you and your loved ones. You and any caregivers will have access to dementia-trained specialists and support staff through our 24/7 support line.

A personal Care Navigator

Your Care Navigator will guide you through the whole journey and check in regularly. They can also make referrals to other specialists and community support organizations.

A dedicated medical team

Our specialist doctors and nurse practitioners will perform an assessment upon enrollment, and at least once a year. Your medical team will create and update your customized treatment plan.

Caregiver training

We host group caregiver training sessions and 1:1 coaching to help you better understand dementia and what it may mean for your family.

Respite care

Respite care allows caregivers to take a rest while a trained home care aide comes to your home to look after your loved one for up to 4 hours.

Support groups

We organize online group activities for you and your family. We're also here to help you get connected to local in-person support groups.

Interested in becoming a member of Isaac Health's GUIDE Program? Reach out to us at care@myisaachealth.com or call us at **(888) 818-2059**.
